INTERPRETING SMALL ANIMAL DENTAL RADIOGRAPHS REPRESENTS A DAILY CHALLENGE.

Here's a great opportunity to learn a few tricks to facilitate your interpretations, as well as to discuss other dentistry topics including:

- ✓ periodontal disease;
- ✓ periapical disease;
- ✓ resorption lesions in cats and dogs.

MEET OUR SPEAKER

Josée Marcoux
DVM, IPSAV
D.E.S. in Dentistry

After returning to college, Dr. Marcoux decided to pursue her dream of becoming a veterinarian, and graduated from the *Faculté de médecine vétérinaire* at the *Université de Montréal* in 2016. As she was immediately drawn to specialty medicine, she began her second year of studies in veterinary dentistry. She completed a general internship working with small animals, as well as a dental residency program at the same university. Dr. Marcoux completed nearly a dozen of external dental medicine internships across Canada and the United States during her curriculum. Throughout her career, she has had the opportunity to deepen her knowledge of exotic species, and handle patients weighing from 2 kg to 600 kg! She now hopes to complete her exam at the American College of Veterinary Dentistry and become a reference in teaching veterinary dentistry in Quebec. Following her residency in 2020, she joined e-vet Mobiles to work more closely with her veterinary colleagues.

At the end of the webcast, you can complete a short CE questionnaire to receive your certificate of participation.
